Raw Serum Cold Chain Process

Temperature Control
- Capable of Maintaining
- Temperature <10°C
- Temperature validates
- Freezer of suitable size

Deficiency corrected?
- Appropriate freezer
- Monitor temperature

Storage Control
- Handled to prevent damage
- Continuously monitored segregation of technical use, quarantine and serum types
- Freezer properly maintained
- Inventory Management

Deficiency corrected?
- Corrective action to prevent damage
- Monitor temperature
- Inventory improvement

Logistical Management
- Cold chain transportation
- Document inventory transfer
- Bill of Lading

Conforms to Raw Material Acceptance
