

Gareth Williams
Sales and Marketing Director, TCS Biosciences

Gareth has worked for TCS Biosciences Ltd (TCS) for over 20 years and has held the position of Sales and Marketing Director since 2006. TCS is a manufacturer and distributor of a wide range of animal and human derived blood and serum products.

We produce Donor Horse Serum from our herds based on our farm in the UK. It is essential that we maintain high quality standards in all aspects of serum production from animal husbandry, through collection to processing and packaging to ensure consistent top-quality products. We recognize that traceability is of prime importance to our customers, and we are renowned for the quality of our documentation trail and our rapid response to specialist customer requirements.

As well as our own manufactured products, we work with carefully selected strategic partners from around the globe importing Bovine Serum products, including Fetal Bovine Serum, for supply to our customers in the UK and Europe.

TCS has been a member of the ISIA for many years and take active roles in some of the sub committees. In 2017 we confirmed our commitment to quality and ethics by becoming ISIA Traceability Certified. This certification covers the manufacture and supply of our own Donor Horse Serum, and the import, handling and logistical pathway of Bovine Serum products sourced from our ISIA Traceability Certified partners.
