

**Nicole Green**  
**ISIA Board Chair**  
**VP of Operations and Communication, Central Biomedica Inc.**

I have been in the serum industry for over 20 years. During this time, I have worked as a Lab Technician, Production Manager, Quality Manager, and Plant Manager. I am currently the Vice President of Operations and Communication for Central Biomedica.

Central Biomedica works exclusively with animal serum and hence complete honesty in collection, paperwork, and labeling is extremely important. Providing safe materials to end users who are producing and creating life-saving products is of the utmost importance to CBI and its employees.

I am excited to serve as Vice-Chair for the ISIA Board of Directors and look forward to the growth and challenges I will encounter.
